

May 15, 2012

I am writing this letter in regards to Syntek Global's product *Xtreme Fuel Treatment*.

Our company has used the *XFT* product for over three years. We have accumulated over two million miles of successful use with no negative side effects from the product.

We have ten trucks in our fleet, which consists of 3 Peter-builts, 6 Freightliners, and 1 International. Our engines include Caterpillar, Detroit, and Cummins. We have greatly benefited from an average 13.6% fuel economy improvement fleet-wide. Which is a net savings of over **\$110,000.00** on an annual basis. Because of the simple push-button dispenser, it is very simple and efficient to add XFT to the fuel every fill up.

We have also been able to extend our service intervals and have noticed a tremendous decrease in fuel system repairs. Due to all of the above listed benefits, I recommend this product to anyone that uses any amount of fuel.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chris Robinson', written over a light blue horizontal line.

Chris Robinson  
CEO/Owner Xtreme Freight Transportation

Beau Robinson  
VP/ Dispatch and Logistics
